

JOBSHEET PRAKTIKUM

Mata Kuliah: Pemrograman Web Lanjut

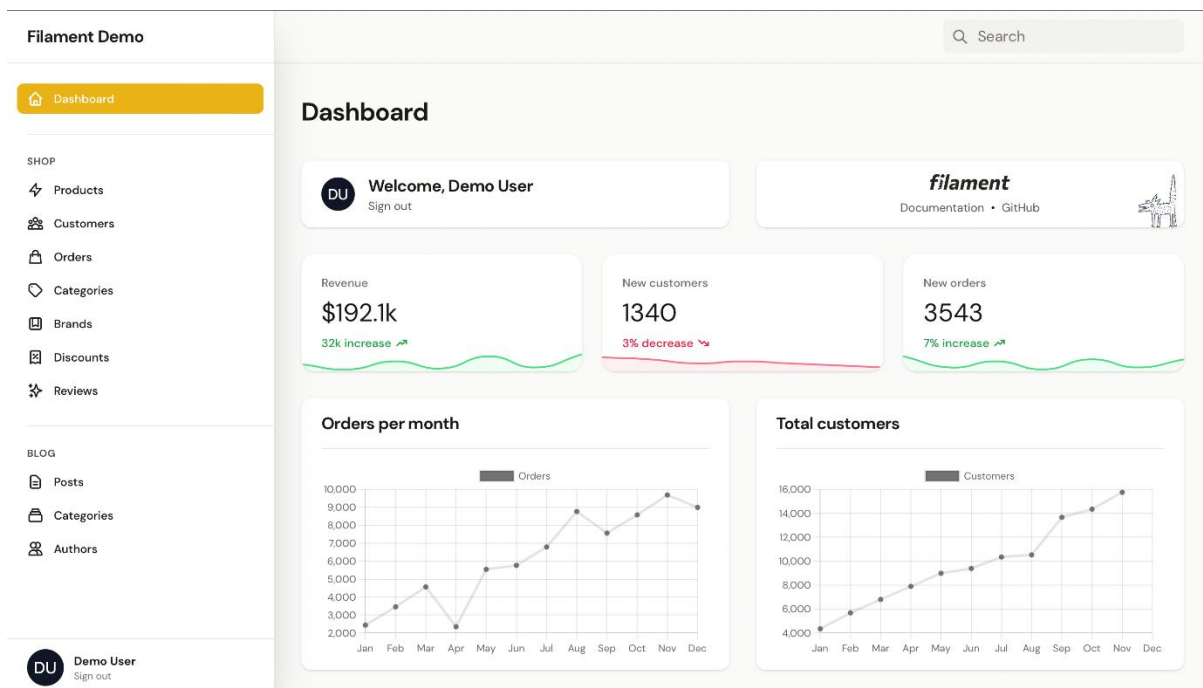

Topik: Instalasi dan Setup Filament PHP v4 pada Laravel 11

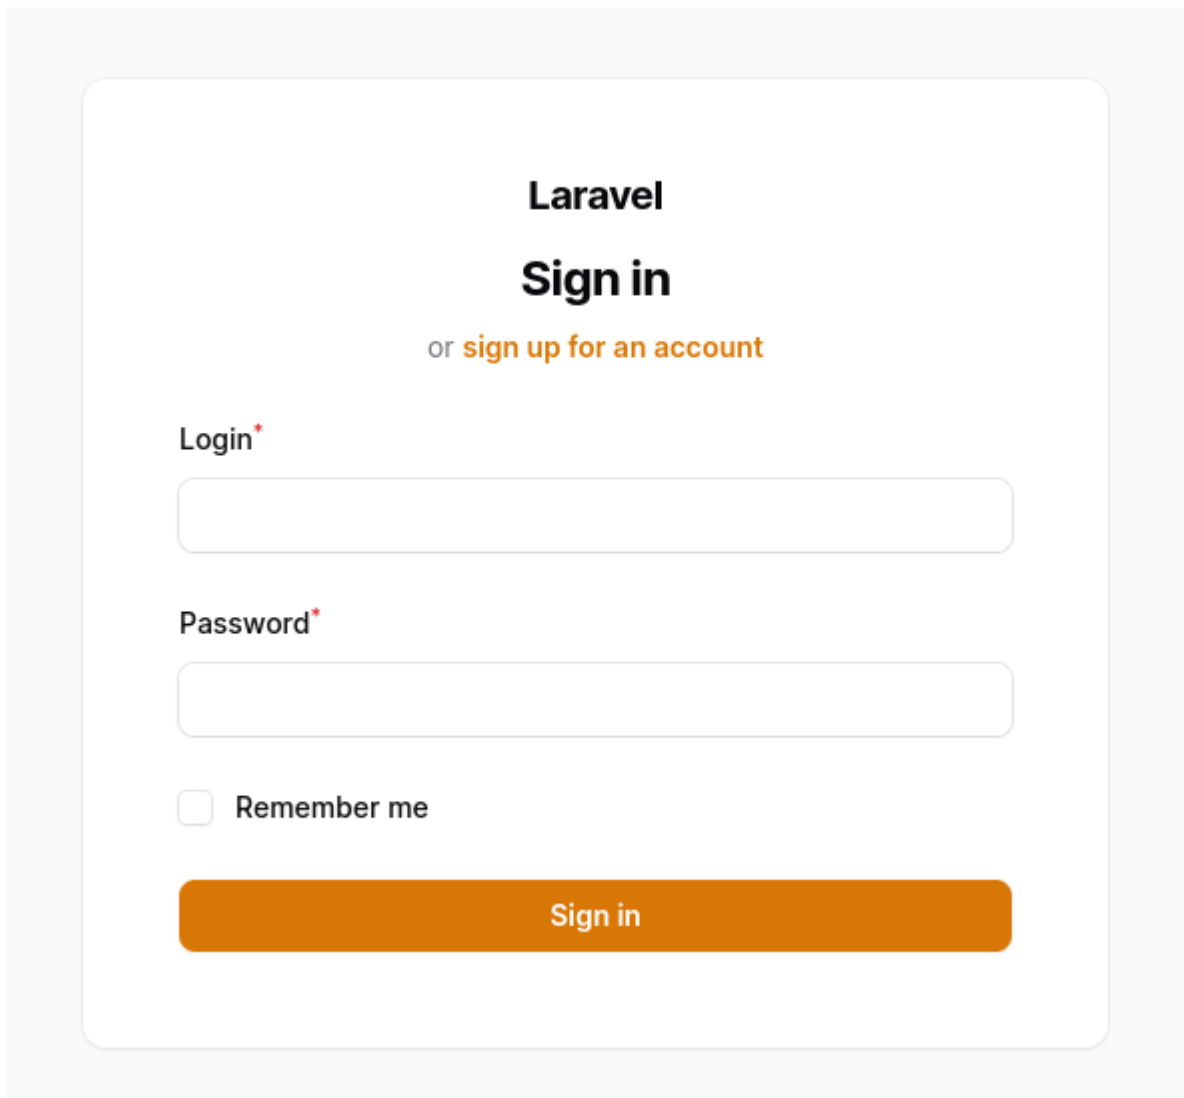

Tujuan Pembelajaran

Setelah menyelesaikan praktikum ini, mahasiswa mampu:

1. Menjelaskan konsep dasar **Filament PHP**
2. Menyebutkan requirement Filament v4
3. Menginstall Laravel 11
4. Menginstall dan mengkonfigurasi Filament v4
5. Membuat user admin Filament
6. Menjalankan dan mengakses admin panel

A. Pengenalan Filament PHP

A screenshot of a Laravel Sign in form. The form is centered on a light gray background. It features a white rounded rectangle containing the text "Laravel" and "Sign in" in bold black font. Below this, it says "or sign up for an account" in a smaller orange font. There are two input fields: "Login*" and "Password*", both with red asterisks. Below the password field is a checkbox labeled "Remember me". At the bottom is a large orange button with the text "Sign in" in white.

Laravel

Sign in

or **sign up for an account**

Login*

Password*

☐ Remember me

Sign in

Apa itu Filament?

Filament adalah framework UI open-source berbasis Laravel yang digunakan untuk membangun admin panel dengan cepat dan elegan.

Filament dibangun menggunakan:

- **Laravel**
- **Livewire**
- **Alpine.js**
- **Tailwind CSS**

Website resmi: <https://filamentphp.com>

Untuk menggunakan **Filament v4**, pastikan sistem memiliki:

Software	Versi Minimum
PHP	≥ 8.2
Laravel	≥ 11
Tailwind CSS	≥ 4.0
Database	MySQL / SQLite

C. Langkah Praktikum

◆ Langkah 1 – Membuat Project Laravel Baru

Buka terminal dan jalankan:

- `laravel new filament-app` (jika dikonfigurasi secara global laravelnya)
- **`composer create-project laravel/laravel PraktikumPWL`**

Saat proses instalasi:

- Starter kit → pilih **No**
- Testing framework → default (Pest)
- Database → SQLite (sementara)
- Install NPM → Yes
- Run build → Yes

Setelah selesai, buka project di VS Code:

- `code filament-app` (jika laravelnya di config secara global)
- `cd .\PraktikumPWL\`

```
PS C:\laragon> ls
```

Directory: C:\laragon

Mode	LastWriteTime	Length	Name
d-----	2/18/2026 10:57 AM		bin
d-----	2/11/2026 10:03 AM		data
d-----	2/11/2026 10:03 AM		etc
d-----	2/27/2026 5:45 PM		tmp
d-----	2/11/2026 10:03 AM		usr
d-----	2/27/2026 11:50 PM		www
-a----	9/16/2022 3:55 PM	2158592	laragon.exe

```
PS C:\laragon> cd www
```

```
PS C:\laragon\www> ls
```

Directory: C:\laragon\www

Mode	LastWriteTime	Length	Name
d-----	2/11/2026 10:24 AM		basic-filament
d-----	2/27/2026 11:45 PM		JobsheetPWL2026
d-----	2/18/2026 2:26 PM		laravel-tiketing
d-----	2/27/2026 11:50 PM		PraktikumPWL
d-----	2/27/2026 7:22 PM		PWL2026_Filament
-a----	10/17/2018 7:31 AM	1952	index.php

```
PS C:\laragon\www> cd .\PraktikumPWL\
```

```
PS C:\laragon\www\PraktikumPWL>
```

◆ Langkah 2 – Konfigurasi Database MySQL

1. Edit file .env

- DB_CONNECTION=mysql
DB_HOST=127.0.0.1
DB_PORT=3306
DB_DATABASE= Filament2026
DB_USERNAME=root
DB_PASSWORD=

 .env 

PraktikumPWL >  .env

22

23 DB_CONNECTION=mysql

24 DB_HOST=127.0.0.1

25 DB_PORT=3306

26 DB_DATABASE=Filament2026

27 DB_USERNAME=root

28 DB_PASSWORD=

29

Jalankan migrasi:

- **php artisan migrate**

```
PS C:\laragon\www\PraktikumPWL> php artisan migrate
[WARN] The database 'Filament2026' does not exist on the 'mysql' connection.

Would you like to create it? (yes/no) [yes]
> yes

[INFO] Preparing database.

Creating migration table ..... 22.57ms DONE

[INFO] Running migrations.

0001_01_01_000000_create_users_table ..... 34.01ms DONE
0001_01_01_000001_create_cache_table ..... 21.72ms DONE
0001_01_01_000002_create_jobs_table ..... 33.94ms DONE

PS C:\laragon\www\PraktikumPWL>
```

◆ Langkah 3 – Install Filament v4

Install package Filament:

- **composer require filament/filament:"^4.0"**

Install Panel Builder:

- **php artisan filament:install --panels**

```
PS C:\laragon\www\PraktikumPWL> php artisan filament:install --panels

What is the panel's ID? [admin]
> admin

All done! Would you like to show some love by starring the Filament repo on GitHub? (yes/no) [yes]
> no
```

Saat diminta:

- Panel ID → admin
- GitHub repository → No

Cek cara install : [Installation - Filament](#)

◆ Langkah 4 – Membuat User Admin

Karena belum ada user admin, jalankan:

- **php artisan make:filament-user**

Isi data:

- Name: admin user
- Email: admin@gmail.com
- Password: 123456

```
PS C:\laragon\www\PraktikumPWL> php artisan make:filament-user

Name:
> Admin User

Email address:
> admin@gmail.com

Password:
> ^C
PS C:\laragon\www\PraktikumPWL> php artisan make:filament-user

Name:
> Admin User

Email address:
> admin@gmail.com

Password:
>

[INFO] Success! admin@gmail.com may now log in at http://localhost/yes/login.
PS C:\laragon\www\PraktikumPWL>
```

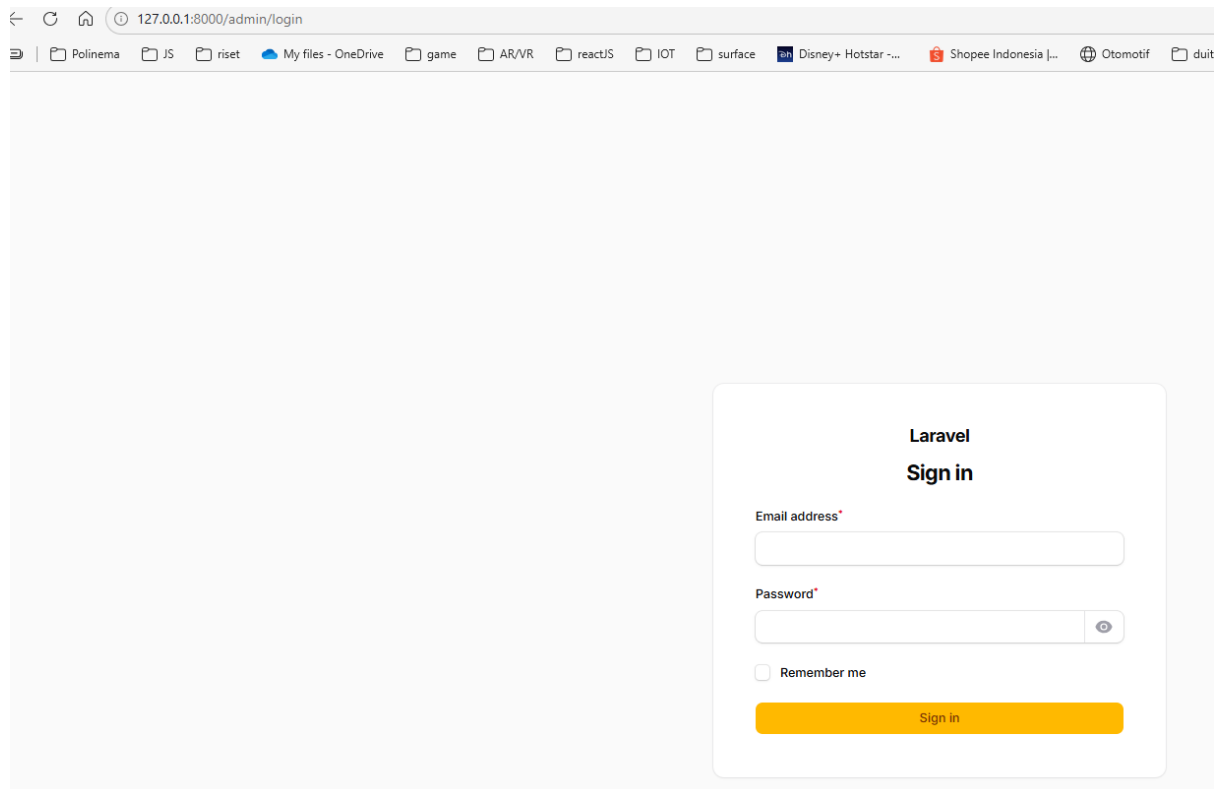

◆ Langkah 5 – Menjalankan Aplikasi

- Php artisan serve

Akses di browser:

<http://localhost:8000/admin>

Login menggunakan akun yang telah dibuat.

📌 D. Hasil yang Diharapkan

Mahasiswa akan melihat:

- Halaman Login Filament
 - Dashboard Admin Minimalis
 - Fitur Dark Mode
 - Data user tersimpan di database
-

E. Analisis & Diskusi

1. Apa kelebihan Filament dibanding membuat admin panel manual?
 2. Mengapa Filament menggunakan Livewire?
 3. Apa perbedaan SQLite dan MySQL dalam development?
 4. Apa fungsi Panel Builder?
-

F. Tugas Praktikum

1. Install Filament di komputer masing-masing
 2. Buat 2 user admin berbeda
 3. Screenshot:
 - Halaman login
 - Dashboard
 - Data user di database
 4. Buat laporan dalam format PDF berisi:
 - Langkah instalasi
 - Kendala yang ditemukan
 - Solusi
-

G. Kesimpulan

Pada praktikum ini mahasiswa telah mempelajari:

- Konsep dasar Filament PHP
- Instalasi Laravel 11
- Instalasi Filament v4
- Konfigurasi database
- Pembuatan user admin

- Menjalankan admin panel

Praktikum selanjutnya akan membahas:

- Resource CRUD
- Form & Table Builder
- Relasi Database
- Custom Dashboard
- Multi Panel System
