

JOBSHEET PRAKTIKUM

Mata Kuliah: Pemrograman Web Lanjut

Pertemuan 4 – Implementasi Form Elements & Resource Post di Filament

Capaian Pembelajaran

Setelah mengikuti praktikum ini, mahasiswa mampu:

1. Membuat Resource Post di Filament
 2. Menggunakan berbagai Form Components
 3. Menghubungkan Select dengan relasi Category
 4. Mengupload file menggunakan File Upload
 5. Menampilkan data relasi pada tabel
 6. Menggunakan Image Column & Storage Link
-

A. Review Pertemuan Sebelumnya

Pada pertemuan 3 kita telah:

- **Membuat Model & Migration Category dan Post**
- **Menambahkan relasi belongsTo**
- **Membuat Resource Category**

Sekarang kita akan membuat Resource Post dengan berbagai komponen form.

Framework yang digunakan:

Filament

B. Membuat Resource Post

Jalankan perintah:

- `php artisan make:filament-resource Post`

Isi:

- Model attribute → title
- Generate read-only page → No
- Generate dari database → No

```

• PS C:\laragon\www\PraktikumPWL> php artisan make:filament-resource Post

The "title attribute" is used to label each record in the UI.

You can leave this blank if records do not have a title.

What is the title attribute for this model?
> title

Would you like to generate a read-only view page for the resource? (yes/no) [no]
> no

Should the configuration be generated from the current database columns? (yes/no) [no]
> no

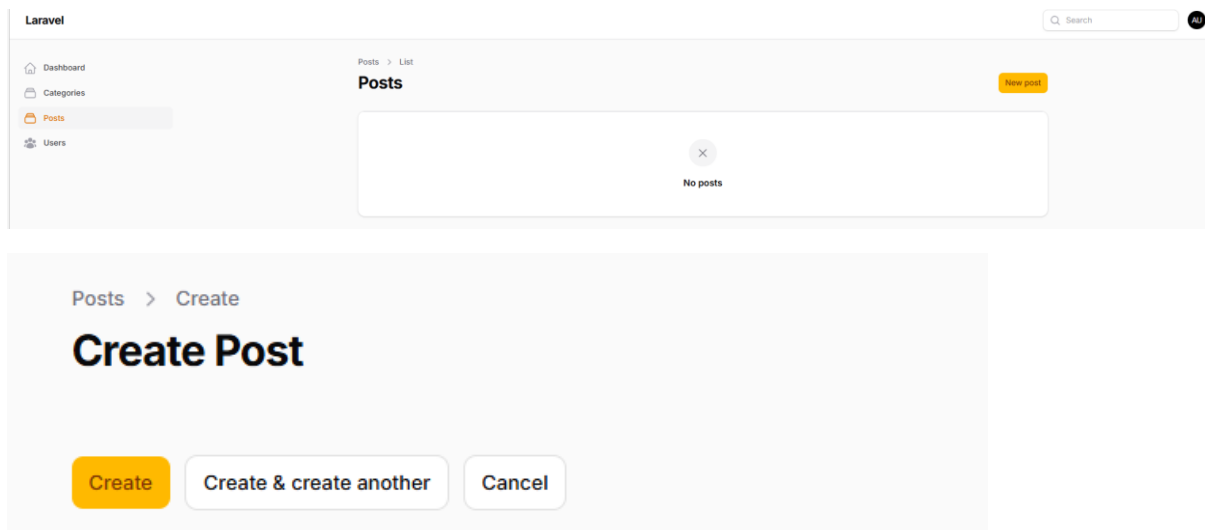

[INFO] Filament resource [App\Filament\Admin\Resources\Posts\PostResource] created successfully.

```

Setelah selesai, akan terbentuk folder:

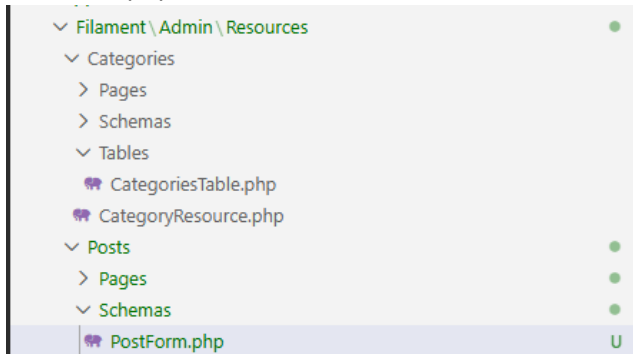

Refresh halaman /admin → menu Posts muncul.

✦ C. Implementasi Form Elements

Buka file:

- PostForm.php

- Modifikasi codenya menjadi sbb

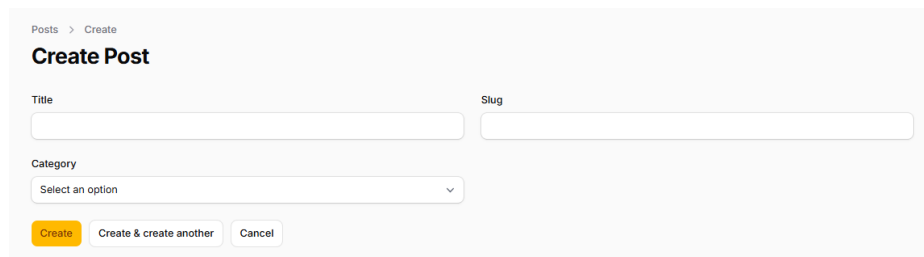

◆ 1. Text Input (Title & Slug)

- `TextInput::make('title')->required(),`
`TextInput::make('slug')->required(),`

PraktikumPWL > app > Filament > Admin > Resources > Posts > Schemas > PostForm.php

```
1  <?php
2
3  namespace App\Filament\Admin\Resources\Posts\Schemas;
4
5  use Filament\Schemas\Schema;
6  use Filament\Forms\Components\TextInput;
7
8  class PostForm
9  {
10     public static function configure(Schema $schema): Schema
11     {
12         return $schema
13             ->components([
14                 //
15                 TextInput::make("title"),
16                 TextInput::make("slug"),
17             ]);
18     }
19 }
20
```

Jalankan browser :

Note doc : [Text input - Filament](#)

◆ 2. Select (Relasi Category)

- Gunakan relasi yang sudah dibuat:
 - `Select::make('category_id')`
 - `->label('Category')`
 - `->options(\App\Models\Category::all()->pluck('name', 'id'))`
 - `)`
 - `->required(),`

PraktikumPWL > app > Filament > Admin > Resources > Posts > Schemas > PostForm.php

```
1  <?php
2
3  namespace App\Filament\Admin\Resources\Posts\Schemas;
4
5  use Filament\Schemas\Schema;
6  use Filament\Forms\Components\TextInput;
7  use Filament\Forms\Components>Select;
8
9  class PostForm
10 {
11     public static function configure(Schema $schema): Schema
12     {
13         return $schema
14             ->components([
15                 //
16                 TextInput::make("title"),
17                 TextInput::make("slug"),
18                 Select::make("category_id")
19                     ->relationship("category", "name")
20                     ->preload()
21                     ->searchable(),
22             ]);
23     }
24 }
25
```

📌 Select ini mengambil data langsung dari tabel categories.

◆ 3. Color Picker

○ ColorPicker::make('color'),

PraktikumPWL > app > Filament > Admin > Resources > Posts > Schemas >  PostForm.php

```

1  <?php
2
3  namespace App\Filament\Admin\Resources\Posts\Schemas;
4
5  use Filament\Schemas\Schema;
6  use Filament\Forms\Components\TextInput;
7  use Filament\Forms\Components\Select;
8  use Filament\Forms\Components\ColorPicker;
9
10 class PostForm
11 {
12     public static function configure(Schema $schema): Schema
13     {
14         return $schema
15             ->components([
16                 //
17                 TextInput::make("title"),
18                 TextInput::make("slug"),
19                 Select::make("category_id")
20                     ->relationship("category", "name")
21                     ->preload()
22                     ->searchable(),
23                 ColorPicker::make("color"),
24             ]);
25     }
26 }
27

```

Hasil: Input pemilih warna otomatis dari Filament.

◆ 4. Markdown / Rich Editor (Body)

Gunakan Markdown Editor:

- MarkdownEditor::make('body'),

```
PraktikumPWL > app > Filament > Admin > Resources > Posts > Schemas > PostForm.php
1  <?php
2
3  namespace App\Filament\Admin\Resources\Posts\Schemas;
4
5  use Filament\Schemas\Schema;
6  use Filament\Forms\Components\TextInput;
7  use Filament\Forms\Components\Select;
8  use Filament\Forms\Components\ColorPicker;
9  use Filament\Forms\Components\MarkdownEditor;
10
11 class PostForm
12 {
13     public static function configure(Schema $schema): Schema
14     {
15         return $schema
16             ->components([
17                 //
18                 TextInput::make("title"),
19                 TextInput::make("slug"),
20                 Select::make("category_id")
21                     ->relationship("category", "name")
22                     ->preload()
23                     ->searchable(),
24                 ColorPicker::make("color"),
25                 MarkdownEditor::make("content"),
26             ]);
27     }
28 }
29
```

- **FileUpload::make("image")**
 ->disk("public")
 ->directory("post"),

```
PraktikumPWL > app > Filament > Admin > Resources > Posts > Schemas > PostForm.php
2
3 namespace App\Filament\Admin\Resources\Posts\Schemas;
4
5 use Filament\Schemas\Schema;
6 use Filament\Forms\Components\TextInput;
7 use Filament\Forms\Components\Select;
8 use Filament\Forms\Components\ColorPicker;
9 use Filament\Forms\Components\MarkdownEditor;
10 use Filament\Forms\Components\RichEditor;
11 use Filament\Forms\Components\FileUpload;
12
13
14 class PostForm
15 {
16     public static function configure(Schema $schema): Schema
17     {
18         return $schema
19             ->components([
20                 //
21                 TextInput::make("title"),
22                 TextInput::make("slug"),
23                 Select::make("category_id")
24                     ->relationship("category", "name")
25                     ->preload()
26                     ->searchable(),
27                 ColorPicker::make("color"),
28                 MarkdownEditor::make("content"),
29                 // RichEditor::make("content"),
30                 FileUpload::make("Image")
31                     ->disk("public")
32                     ->directory("posts"),
33             ]);
34     }
35 }
36
```

✚ Pastikan .env memiliki:

- APP_URL=http://localhost:8000

Jalankan perintah berikut jika gambar tidak muncul:

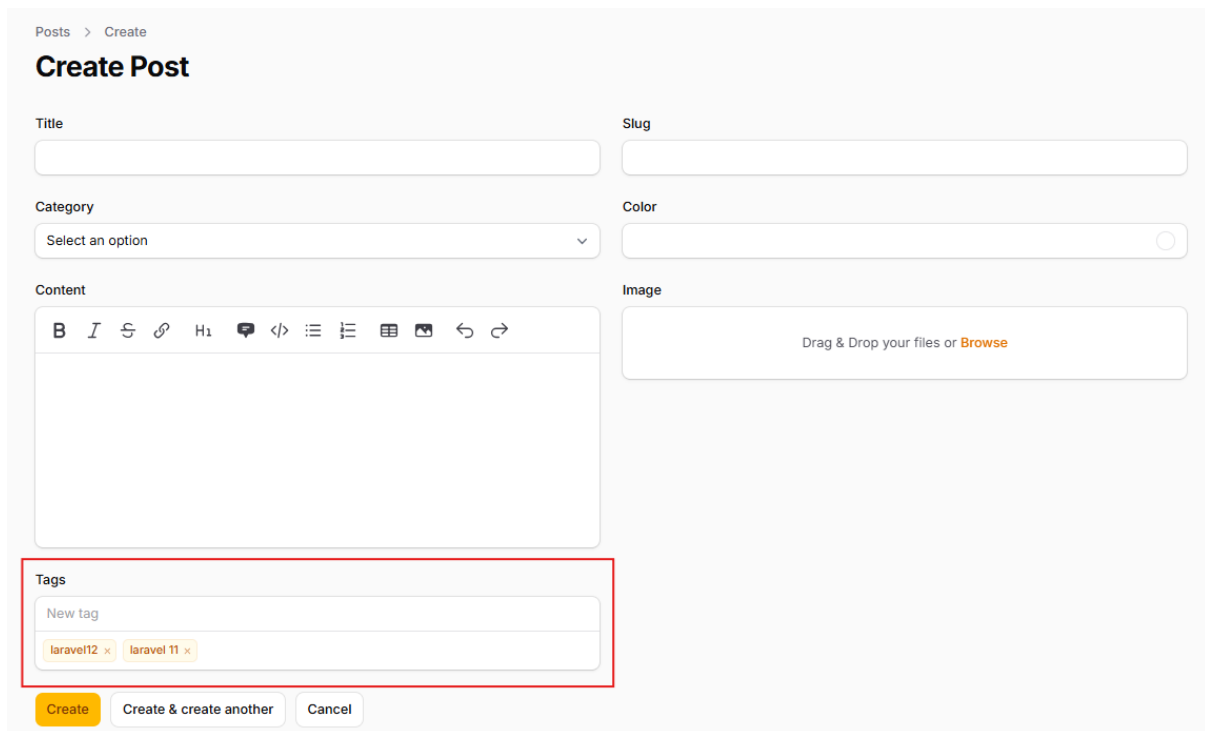

- **php artisan storage:link**

◆ 6. Tags Input

- **TagsInput::make('tags'),**

```
PraktikumPWL > app > Filament > Admin > Resources > Posts > Schemas > PostForm.php
1  <?php
2
3  namespace App\Filament\Admin\Resources\Posts\Schemas;
4
5  use Filament\Schemas\Schema;
6  use Filament\Forms\Components\TextInput;
7  use Filament\Forms\Components\Select;
8  use Filament\Forms\Components\ColorPicker;
9  use Filament\Forms\Components\MarkdownEditor;
10 use Filament\Forms\Components\RichEditor;
11 use Filament\Forms\Components\FileUpload;
12 use Filament\Forms\Components\TagsInput;
13
14 class PostForm
15 {
16     public static function configure(Schema $schema): Schema
17     {
18         return $schema
19             ->components([
20                 //
21                 TextInput::make("title"),
22                 TextInput::make("slug"),
23                 Select::make("category_id")
24                     ->relationship("category", "name")
25                     ->preload()
26                     ->searchable(),
27                 ColorPicker::make("color"),
28                 MarkdownEditor::make("content"),
29                 // RichEditor::make("content"),
30                 FileUpload::make("Image")
31                     ->disk("public")
32                     ->directory("posts"),
33                 TagsInput::make("tags"),
34             ]);
35     }
36 }
37
38
```

Karena field tags bertipe JSON, pastikan sudah di-cast ke array pada model.

◆ 7. Checkbox (Published)

- Checkbox::make('published'),

PraktikumPWL > app > Filament > Admin > Resources > Posts > Schemas > PostForm.php

```
2
3 namespace App\Filament\Admin\Resources\Posts\Schemas;
4
5 use Filament\Schemas\Schema;
6 use Filament\Forms\Components\TextInput;
7 use Filament\Forms\Components\Select;
8 use Filament\Forms\Components\ColorPicker;
9 use Filament\Forms\Components\MarkdownEditor;
10 use Filament\Forms\Components\RichEditor;
11 use Filament\Forms\Components\FileUpload;
12 use Filament\Forms\Components\TagsInput;
13 use Filament\Forms\Components\Checkbox;
14
15 class PostForm
16 {
17     public static function configure(Schema $schema): Schema
18     {
19         return $schema
20             ->components([
21                 //
22                 TextInput::make("title"),
23                 TextInput::make("slug"),
24                 Select::make("category_id")
25                     ->relationship("category", "name")
26                     ->preload()
27                     ->searchable(),
28                 ColorPicker::make("color"),
29                 MarkdownEditor::make("content"),
30                 // RichEditor::make("content"),
31                 FileUpload::make("Image")
32                     ->disk("public")
33                     ->directory("posts"),
34                 TagsInput::make("tags"),
35                 Checkbox::make("published"),
36             ]);
37     }
38 }
39
```

◆ 8. Date Picker (Published At)

- **DatePicker::make('published_at'),**

PraktikumPWL > app > Filament > Admin > Resources > Posts > Schemas >  PostForm.php

```

3  namespace App\Filament\Admin\Resources\Posts\Schemas;
4
5  use Filament\Schemas\Schema;
6  use Filament\Forms\Components\TextInput;
7  use Filament\Forms\Components\Select;
8  use Filament\Forms\Components\ColorPicker;
9  use Filament\Forms\Components\MarkdownEditor;
10 use Filament\Forms\Components\RichEditor;
11 use Filament\Forms\Components\FileUpload;
12 use Filament\Forms\Components\TagsInput;
13 use Filament\Forms\Components\Checkbox;
14 use Filament\Forms\Components\DateTimePicker;
15
16 class PostForm
17 {
18     public static function configure(Schema $schema): Schema
19     {
20         return $schema
21             ->components([
22                 //
23                 TextInput::make("title"),
24                 TextInput::make("slug"),
25                 Select::make("category_id")
26                     ->relationship("category", "name")
27                     ->preload()
28                     ->searchable(),
29                 ColorPicker::make("color"),
30                 MarkdownEditor::make("content"),
31                 // RichEditor::make("content"),
32                 FileUpload::make("image")
33                     ->disk("public")
34                     ->directory("posts"),
35                 TagsInput::make("tags"),
36                 Checkbox::make("published"),
37                 dateTimePicker::make("published_at"),
38             ]);
39     }
40 }
41
42

```

Data masih belum muncul

Untuk memunculkan data lakukan langkah-langkah berikut

Buka file:

- **PostsTable.php**

Tambahkan kolom berikut:

- `TextColumn::make('title'),`
`TextColumn::make('slug'),`
`TextColumn::make('category.name'),`
`ColorColumn::make('color'),`
`ImageColumn::make('image')`
`->disk('public'),`

PraktikumPWL > app > Filament > Admin > Resources > Posts > Tables > PostsTable.php

```
1  <?php
2
3  namespace App\Filament\Admin\Resources\Posts\Tables;
4
5  use Filament\Actions\BulkActionGroup;
6  use Filament\Actions\DeleteBulkAction;
7  use Filament\Actions>EditAction;
8  use Filament\Tables\Table;
9  use Filament\Tables\Columns\TextColumn;
10 use Filament\Tables\Columns\ColorColumn;
11 use Filament\Tables\Columns\ImageColumn;
12
13
14 class PostsTable
15 {
16     public static function configure(Table $table): Table
17     {
18         return $table
19             ->columns([
20                 //
21                 TextColumn::make('title'),
22                 TextColumn::make('slug'),
23                 TextColumn::make('category.name'),
24                 ColorColumn::make('color'),
25                 ImageColumn::make('image')
26                 ->disk('public'),
27             ])
28             ->filters([
29                 //
30             ])
31             ->recordActions([
32                 EditAction::make(),
33             ])
34             ->toolbarActions([
35                 BulkActionGroup::make([
36                     DeleteBulkAction::make(),
37                 ]),
38             ]);
39     }
40 }

Jika gambar blm muncul maka lakukan

- **php artisan storage:link**

● PS C:\laragon\www\PraktikumPWL> php artisan storage:link

INFO The [C:\laragon\www\PraktikumPWL\public\storage] link has been connected to [C:\laragon\www\PraktikumPWL\storage\app/public].

- pastikan tulisan image pada PostForm dan PostTable sama

- **Gambar berhasil muncul**

Tambahkan code berikut pada CreatePost.php dan EditPost.php agar ketika selesai edit atau membuat inputan baru maka ketika di save akan kembali ke index

PraktikumPWL > app > Filament > Admin > Resources > Posts > Pages > EditPost.php

```
1 <?php
2
3 namespace App\Filament\Admin\Resources\Posts\Pages;
4
5 use App\Filament\Admin\Resources\Posts\PostResource;
6 use Filament\Actions\DeleteAction;
7 use Filament\Resources\Pages\EditRecord;
8
9 Windsurf: Refactor | Explain
10 class EditPost extends EditRecord
11 {
12     protected static string $resource = PostResource::class;
13
14     protected function getHeaderActions(): array
15     {
16         return [
17             DeleteAction::make(),
18         ];
19     }
20
21     protected function getRedirectUrl(): string
22     {
23         return $this->getResource()->getUrl('index');
24     }
25 }
```

PraktikumPWL > app > Filament > Admin > Resources > Posts > Pages > CreatePost.php

```
1 <?php
2
3 namespace App\Filament\Admin\Resources\Posts\Pages;
4
5 use App\Filament\Admin\Resources\Posts\PostResource;
6 use Filament\Resources\Pages\CreateRecord;
7

📌 G. Pengujian

1. Buat minimal 1 Post
2. Pilih Category
3. Upload gambar
4. Centang Published
5. Pilih tanggal publish
6. Klik Create

Cek:

- Data tersimpan di database
- Gambar tersimpan di storage/app/public/post
- Gambar tampil di tabel

📌 H. Hasil yang Diharapkan

Mahasiswa berhasil:

- ✓ Menggunakan berbagai Form Elements
 - ✓ Menghubungkan Select dengan relasi database
 - ✓ Mengupload dan menampilkan gambar
 - ✓ Menampilkan relasi category.name
 - ✓ Menggunakan casting JSON & Boolean
-

✦ I. Analisis & Diskusi

1. Mengapa kita perlu storage:link?
 2. Apa fungsi \$casts untuk field JSON?
 3. Mengapa kita menggunakan category.name bukan category_id?
 4. Apa perbedaan RichEditor dan MarkdownEditor?
-

✦ J. Tugas Praktikum

1. Tambahkan validasi:
 - Title minimal 5 karakter
 - Slug unik
 2. Tambahkan kolom:
 - Published (ikon boolean)
 3. Buat minimal 3 Post berbeda
 4. Screenshot:
 - Form Create Post
 - Tabel Post
 - Struktur folder storage
 5. Buat laporan PDF
-

✦ K. Kesimpulan

Pada pertemuan ini mahasiswa telah mempelajari:

- Form Elements pada Filament
- Select berbasis relasi
- File Upload
- Markdown Editor
- Checkbox & DatePicker

- Menampilkan relasi di tabel
